PROJECTS

PORTFOLIO

This is my Portfolio designed and developed by me. Tried to develop as much friendly as possible. This portfolio contains information about myself, projects I did and my Resume. Developed in React.js

BILLING APPLICATION

At some small shops, the shopkeeper needs to keep his selling history in a diary/billing book. This application provides easy method to bill generation as well as accessing bill history and other userfull options too.

INTERN MANAGEMENT

Many startup companies and other companies not having any application for managing interns. Using this application they can easily manage their interns and have history of data also. They can add new interns, assign work to them, create group of interns for working under employee, giving feedback to intern etc.
